REPORT

Title: Preplacement Talk VI PharmD

Report No: 2

Information:

The Session started at 9:00 am on 17th December, 2019 and program centered the career guidance for PharmD students. The session initiated with resume writing by Mrs Litha Thomas. Followed by career counseling session from Prof. Mallya.

Conclusion:

Prof Mallya elaborated major career options which are in trend these days and have great scope in future, namely discovery, chemical field, pharmaceuticals, clinical, regulatory, pharmacovigilance and medical writing, Space pharmacy, nuclear pharmacy.

Also, students were given a brief session on the higher studies abroad. In this session, Professor explained:

1. Various exams to be cleared
2. How to apply to universities
3. How to get scholarships

Also, added how to do part time jobs in Canada and other western countries along with the university studies. Additionally, added how to prepare and clear license exams in these countries.

Remark:

Session was interactive and enlightened vision of having the young minds bloom with the flying colors and reach great heights. The session left bright vision and the zeal to conquer the vision. Students are interested have many more sessions like this in the future.

KRUPANIDHI COLLEGE OF PHARMACY
PREPLACEMENT SESSION FOR NOVONORDISK

TAKEN BY : Ms Nikita G

Date: 07/03/2020

Time: 11:30am -1:30pm

The Session started at 11:30am and program centered the role Clinical research associate (CRA) in Clinical research. After the introductory session by Mrs. Litha, the session started with the basic concepts should be followed while attending an interview. Then we moved on to the importance of Resume and it was defined to us as an extension of you in an interview and serves as your professional profile. Make sure that you are honest in your resume and during the interview and we moved on concept of Attitude and first impression which comes when one person first encounters another person and creates a mental image of that person that can be Informal and Formal. Then we moved on to any form of interaction involving touch & it also confines with the way of giving shake hands. Neither should be a limp fish nor Bone crushers. Then we were taught with the importance of Communication skill. It could be done by transforming a normal word to a business word. And make sure that should be much confident with the in-depth information about our past research.

Then we moved on to the main concept of design of Clinical research. Researchers design clinical trials to answer specific questions related to medical product. And these trials usually follow a study plan called a protocol. Then we moved to the concept how CRA's design their work also the following concerns:

- Who qualifies to participate (Selection criteria)
- How many people will be the part of study
- How long the study will last
- How the drug will be given and at what dosage
- What assessments will be conducted and what data is collected
- How the data will be reviewed and analyzed

Patient's safety should be the number one priority in clinical research and we also learned the role of CRC, Principal investigator, etc in clinical trials and the importance of Informed consent, Process by which a subject voluntarily confirms his or her willingness to participate in a trial. And we were also taught with the pros and cons of Sponsor and CRO companies. And the session ended by 1:30pm.
